Forecast for Tuesday 20 Jul 2021

Weather: Dry and fairly warm through the early hours with clear skies. Any valley mist quickly lifting after dawn to leave another dry and sunny day. Temperatures rising quickly and feeling hot by the afternoon, especially on south facing slopes. Some cumulus cloud bubbling up by the afternoon but staying above summits. A very small chance of an isolated shower, possibly with thunder developing during the afternoon. Otherwise, staying dry and clear into the evening and overnight period.

Chance of cloud free mountain/hill tops above 800m: 100% throughout

Visibility: Locally poor in any valley mist first thing. Otherwise very good with distant hills and landmarks easily visible. A slight heat haze during the afternoon, with this reducing the air clarity a little.

Freezing Level*	2900m	2800m	2900m	2900m	2900m	2800m	2800m	2800m	2900m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Another very warm day with very high UV levels which will give a high risk of sunburn, and the hot conditions will give a risk of dehydration and heat exhaustion. Remember sun protection and plenty of water if you are heading into the mountains.

Forecast for Wednesday 21 Jul 2021

Weather: Dry and sunny during the morning and quickly becoming very warm or hot once again. Small amounts of cloud bubbling up during the afternoon and once again a small chance of a rogue shower developing with a risk of thunder, but most likely remaining dry.

Maximum wind: Variable or northwesterly 5-10 mph

Chance of cloud free mountain/hill tops above 800m: 100%

Visibility: Locally poor in any valley mist first thing. Otherwise very good with distant hills and landmarks easily visible. A slight heat haze during the afternoon, with this reducing the air clarity a little.

Temperature: **Valleys:** Plus 14 Celsius rising to plus 30 Celsius.
At 800m: Plus 17 Celsius rising to plus 24 Celsius.
Freezing level: Well above the summits.
